

UK Sports Records Cheat Sheet

Overview

Some UK sports organisations publish public-facing records showing club affiliation and performance.

These datasets commonly include:

- Full name of participant
- Affiliated club (name and location)
- Age group or competition category
- Competition history or match roster
- Year of participation or league season

Why It Matters

- Linking individuals and family to geographic areas
- Understanding lifestyle and interest
- Finding low-digital-footprint individuals, especially teenagers or early-career professionals

Limitations

- **Fragmented sources** – data is hosted on niche platforms
- **Limited personal info** – often just first/last name and town or team
- **Name duplication** – common names require extra context to confirm identity

Tips and Considerations

- Pivot from a sports club name to **explore local news, social posts, and event listings**
- Records can indicate **training schedule, associates, or recent travel**
- Search **archived or cached versions** if current season data has been removed

Investigation Support

- **Location Verification** – Tie **subjects or their family members** to towns via club memberships
- **Surveillance Planning** – Understand **travel routines** or weekend activity
- **Background Checks** – Identify **lifestyle indicators**, especially for under-the-radar individuals
- **Executive Protection** – Spot potential vulnerabilities in child or family **exposure**
- **Youth Safety / Safeguarding** – Assess subjects interacting with **vulnerable** individuals

Where to Search

- **FA Full-Time** – rosters and fixtures for FA-affiliated clubs from grassroots to semi-pro
- **Swimming Results** – Competition times and athlete clubs
- **Hole19** – Golf app showing member results, leader boards, and clubs
- **Public Insights** – Search multiple sports by athlete name

About Public Insights

Public Insights helps investigators find addresses, associates, and financial signals tied to UK people and businesses — all from a single search. The platform brings together government and commercial records to uncover properties, companies, directorships, insolvencies, and more. Designed for OSINT workflows, it's the starting point for investigations into fraud, due diligence, asset tracing, and more. Try Public insights today at cradle.publicinsights.uk/accounts/signup to see how our platform can support your investigation workflows.
